

Information of NGK ADREC CO., LTD.

Y. Nakanishi

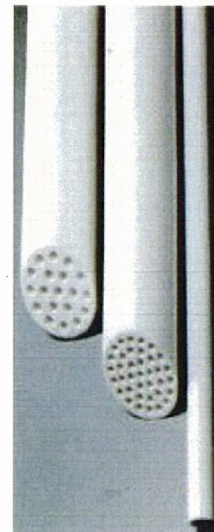

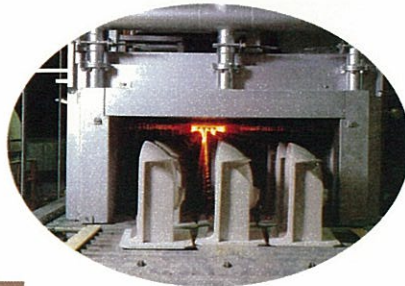

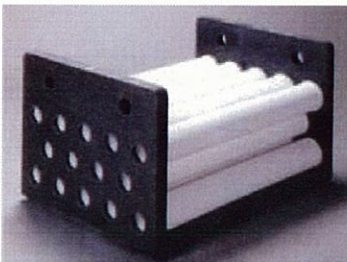

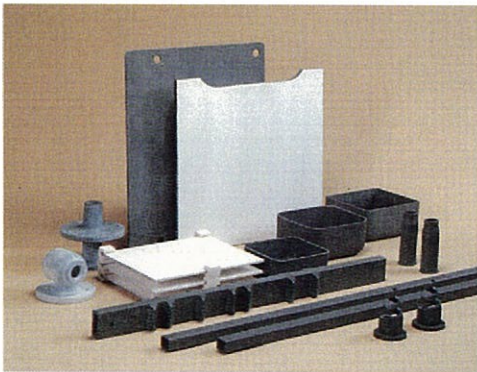

Engineering Center, Engineering Department, NGK ADREC CO., LTD.
3040 Mizano, Mitake-cho, Kani-gun, Gifu 505-0112, Japan

E-mail: CQW22757@nifty.ne.jp

Key Words: refractory, kiln, furniture

Introduction

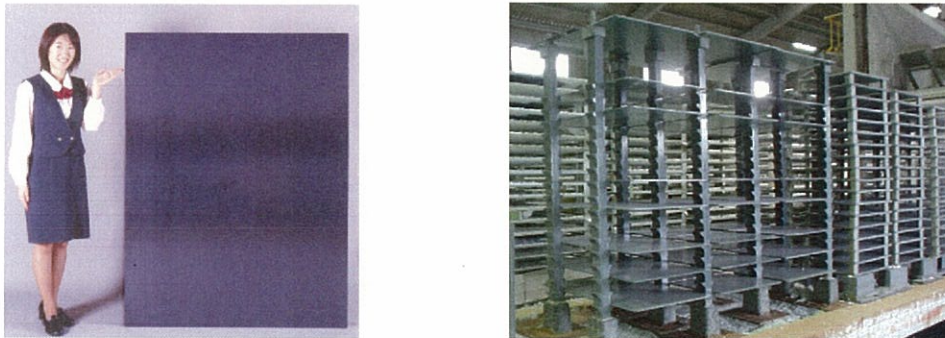

NGK ADREC CO., LTD.'s Ceramics Products has superior characteristics in mechanical strength, wear resistance and corrosion resistance and they are widely used in refractory and for other applications.

Especially NEWSIC(Silicon infiltrated Silicon carbide) is used for high-reliability refractories in high temperature and high speed firing such as thin and light kiln furniture because of its high mechanical strength ,superior heat shock resistance ,high thermal conductivity and excellent oxidation resistance.

NGK ADREC CO.,LTD.developed new material,SINSIC(silicon nitride bonded silicon carbide)improved max service temperature and superior corrosion resistance against chemicals.SINSIC is used for high-reliability refractories in high temperature such as large and long size kiln furniture because of its high mechanical strength.

About Myself

Name: Yasuhisa Nakanishi
Born: April,10, 1977
Nationality: Japanese
Hometown Tajimi, Gifu, Japan
Hobby Trip, Music, Movie,reading
Favorite Movie CHICAGO

Affiliation : ①NGK ADREC CO.,LTD.Engineering Department,Engineering Center
